TYPE

We work in close contact with companies and we perform investigator-driven research

MEETING YOUR NEEDS

Vision R&D specializes in offering preclinical and clinical ocular research services "from bench to bedside". We can support a wide array of organizations, from start-ups to global pharmaceutical and medical device companies, to efficiently bring their new products from concept to market. Vision R&D can provide consultation to understand client goals and objectives, and work with you to design an appropriate study to achieve those objectives.
